INFOCUS LP335 “DRAGONFLY” XGA LCD PROJECTOR

The new InFocus LP335 True XGA "Dragonfly" combines 1000 lumens with enhanced video quality and connectivity into the best-looking projector available. Rentfusion’s Pro-AV Gurus say “Now there's even more to love, with nothing more to carry.

Key Features

- **Incredibly light —** at just 4.8 pounds, it's our lightest projector ever.
- **Incredibly small —** only 8.75" x 9.75" x 2.5", the size of a hard-cover novel.
- **Great-looking —** sleek, impressive design.
- **True XGA —** 1024x768 resolution to match your high-end laptop.
- **Film-like image quality —** its Digital Light Processing™ display offers bright image and true-to-life colors.
- **Bright —** 1000 lumens projects truly stunning images in any setting.
- **Zoom lens and elevator foot —** ensure perfect image size, focus, and position.
- **Easy to connect —** uses advanced M1-DA DVI Digital and analog connector with USB mouse.
- **Plug-and-project setup —** intelligent electronics provide automatic synchronization, tracking, image positioning, and video source detection.
- **Video —** better quality than a big-screen TV and it works with all video inputs.
- **HDTV compatible —** projector automatically resizes 1080i HDTV input preserving 16:9 ratio.
- **Built-in audio —**1-Watt speaker.
- **Whisper quiet —** for distraction-free viewing.
- **Carry case —** its own ultra-compact carry case is included.
- **Executive Plus Remote —** so you can control your presentation from anywhere in the room.
